

Janet's premier presentation is Leading from Your Soul which is based on her book *Real Power*.

LEADING FROM YOUR SOUL is a key note speech, a half-day, full-day, or extended day workshop based on the myth-exploding book, *Real Power*, in which Janet identifies leadership styles and stages of power. Leading from your soul is about real power, the kind of inner power you develop after you think you know it all.

LEADING FROM YOUR SOUL is a laboratory of learning that makes abstract ideas and concepts applicable, understandable, and interactive in a thought-provoking workshop setting designed to:

- Facilitate the visioning process necessary for personal and organizational growth
- Enhance leadership development
- Provide a framework for change, transition, and growth within any corporate culture

LEADING FROM YOUR SOUL incorporates both theory and application, as Janet tells stories, presents research, uses humor and interactive experiences to integrate fifteen years of organizational field research, corporate consulting, observations, discussions, interviews and personal experience. In her work she frequently utilizes the Personal Power Profile.

LEADING FROM YOUR SOUL is for individuals who aspire to power, for leaders who long to understand what true leadership really is, and for organizations needing practical tools for developing people and vision.

Janet customizes workshops for groups such as church leaders, non-profit executives, and corporate leaders.
